

PTFE Tapes, Fabrics & Films

for Bag & Pouch Packaging, Heat-Sealing & Converting.

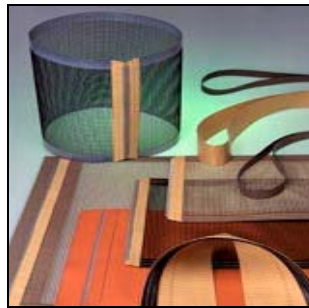

HPP PTFE Products: Are versatile materials for chemically hostile, mechanically severe and thermally extreme Heat Sealing applications. These unique materials maintain outstanding release characteristics and flexibility over a broad range of operating temperatures in varied processing environments. HPP products are typically composed of PTFE Coated Glass, PTFE Films, and Silicone Rubber Coated Glass. A variety of substrates, thickness, weights and surface textures can be produced in a diversity of styles.

FABRICS

- PTFE Coated Glass
- Silicone Coated Glass
- PTFE Film / Glass
- Tear Resistant PTFE Glass

BELTS

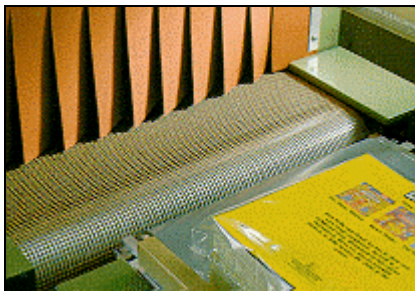

- Continuous Rotary Sealing
- Side-Seal Packaging
- Open Mesh Shrink Tunnel
- Custom Sizes

TAPES

- PTFE Coated Glass
- PTFE Film / Glass
- PTFE Film
- Silicone Rubber

The primary features: HPP Tapes, Fabrics & Belts offer exceptional release properties and superior chemical and electrical characteristics over wide temperature ranges. In addition, these products are dimensionally stable and resistant to distortion under heat and pressure.

SHRINK TUNNEL BELTS / TAPE

VERTICAL SEALING

AUTO-PACK SIDE SEAL BELTS

Applications Include: Continuous Rotary Sealing, Bar Sealing, Bag & Pouch Sealing, Covering Sealing Surfaces on Polyethylene Bag-Making Equipment, L-Bar Sealers, Impulse Sealers, Bag Sealers, Guide Rails, Chute Linings, Non-Stick Roll Covering, Shrink-Tunnel Belts / Curtain, Conveyor Belts for Side & Base Sealing Auto-Pack Machines.
